## **SCOPE OF WORK:**

**College management system** is to provide an easy way not only to automatic all functionalities of a college, but also to provide full functional reports to top management of college with the finest of details about any aspect of college.

College management system has the perspective of attaining attraction of those colleges which don't have one good performing software for keeping their information secure and make their management easier.

College management system provides one attractive environment where you can manipulate date and information about students and staff easily. So we can say the core purpose of designing "College Management System" is to manage the task related to the college students/employees and to redact time to searching of appropriate candidates in college view.

This system provides the details structure of the college campus and its departments, College management System Synchronizes the working of all the departments, It looks on all aspects of a college, its students, faculties, Departments, marks and other co-curricular activities.

**Wonder Point Creative Solutions Private Limited** will perform the work as described in each phase of the project below:
